PROFESSIONAL SUMMERY

Java Full Stack Developer with 3 years of experience in building scalable web applications for clients like GE Healthcareand Taksh Consulting. Expertise in both backend and frontend development, delivering robust, high-performance solutions. Proficient in modern technologies such as Java, Spring Boot, Angular, and MySQL. Demonstrated ability to optimize databases, streamline processes, and improve user experiences, resulting in increased operational efficiency. Skilled in Agile development, cross- functional collaboration, and troubleshooting complex business problems. Over 2 years of experience with AI-assisted development using Claude, ChatGPT, and GitHub Copilot for coding, debugging, optimization, and problem-solving.

SKILLS

- **Backend**: Java, Spring Framework, Spring Boot, RESTful APIs, JDBC, Hibernate
- **Databases**: MySQL, SQL
- **Frontend**: Angular
- **Tools & Technologies:** Spring Tool Suite (STS), Eclipse, PyCharm, VSCode, Bitbucket, Git/GitHub, Postman, Jira, Tomcat
- **Testing**: Unit Testing, Manual Testing
- **Other**: Python, Selenium (Web Scraping), pandas, Excel, Web Performance Optimization, Agile Development

WORK EXPERIENCE

Integrated Personnel Services Ltd., Bangalore
Senior Software Developer 11/2025 – Present

- Leading the development and enhancement of the ERP system for ADU Infra and BSWML (Bengaluru Solid Waste Management Limited).
- Designing, developing, and maintaining modules including Attendance Management (Live Attendance, Manual Attendance, Leave Management, and Payment Leave), Material Management, Spares Management, and Fuel Management.
- Developing and enhancing scalable RESTful APIs and backend services using Java, Spring Boot, Hibernate/JPA, and MySQL to support business-critical operations.
- Collaborating with business stakeholders and clients to analyze requirements, provide technical solutions, and deliver high-quality features within project timelines.
- Leading code reviews, mentoring team members, resolving production issues, and ensuring application performance, reliability, and maintainability.
- Developing reporting modules, implementing new business requirements, and continuously enhancing the ERP system to improve operational efficiency.

SABADO Technologies, Bangalore
Associate Software Developer 11/2022 – 12/2024

- Developed and maintained web applications using **Java**, **Spring Boot**, **Angular**, and **MySQL**, ensuring high performance and scalability.
- Built **RESTful APIs** and integrated them with the frontend using **Angular**, improving user experience and application functionality.
- Spearheaded **MySQL** database design and optimization, resulting in faster data retrieval and system efficiency.
- Deployed applications on **Apache Tomcat**, ensuring smooth server operation and handling of large user requests.
- Collaborated with clients for requirements gathering, system updates, and troubleshooting, leading to higher customer satisfaction.
- Managed version control with **Git**, **GitHub**, and **Bitbucket**, and tracked project progress using **Jira**.

PROJECTS

- **Billing Tracking System (BTS) for GE Healthcare**
  Role: Full Stack Developer
  Technologies Used: Java, Spring Framework, MySQL, Bootstrap, Angular, Apache Tomcat.
  Description:
  - Developed a web-based Billing Tracking System that enables users to monitor the progress of bills through the legislative process in real-time.
  - Designed and implemented user-friendly interfaces for tracking bill status, providing end-users with clear insights into legislative updates.
  - Integrated backend services to ensure accurate tracking of bill data and milestones within the legislative workflow.
  - Enhanced the system's performance and data retrieval processes.
  - Delivered a robust and scalable solution that streamlined bill tracking and improved the efficiency of legislative process monitoring.

- **Spares Consumables Tools Management (SCTM) for GE Healthcare.**
  Role: Full Stack Developer
  Technologies Used: Java, Spring Framework, MySQL, Apache Tomcat, Angular
  Description:
  - Developed SCTM using Java and Spring, facilitating real-time management of spare tools and consumables.
  - Managed the integration of data from Oracle Siebel and handled vendor invoice payments, streamlining the billing workflow.
- **License Tracking System for GE Healthcare.**
  Role: Full Stack Developer
  Technologies Used: Angular 13, Spring Framework, Java 8, MySQL, Tomcat, GitHub
  Description:
  - Migrated the License Tracking System from PHP to a Java-based platform, improving performance and scalability.
  - Developed key features to allow customers to book, reserve, and manage quantities of parts, improving transaction efficiency by 40%.
  - Automated manual processes, reducing the administrative burden and improving report accuracy.

- **X-Ray Plant Automation for Wipro & GE Healthcare**
  Role: Full Stack Developer
  Technologies: HTML, CSS, Angular 17, Spring Boot, Java 17, MySQL, Tomcat, GitHub.
  Description:
  - Led a team of 4 in developing a Skill Matrix Application to automate task assignments based on employee skills, improving production quality and efficiency.
  - Designed and implemented the frontend with Angular 17 and the backend with Spring Boot, ensuring seamless task allocation.
  - Integrated MySQL to track employee availability and skill sets, contributing to a significant reduction in manual task assignments.

- **Web Scraping**
  Role: Developer
  Technologies: Python, Selenium, pandas, Excel
  Description:
  - Developed a Python-based web scraping solution to extract product details such as price, category, size, and quantity from Fresh Market and Walgreens websites for multiple store locations.
  - Automated the scraping process using Selenium, and processed the data with pandas for further analysis.
  - Exported the cleaned data to Excel, allowing for easy analysis and comparison across store locations, reducing manual data entry by 50%.

EDUCATION

- BTech (Mechanical Engineering) – Government College Of Engineering, Kalahandi (2019 – 2022) | CGPA: 8.89
- Diploma (Mechanical Engineering) – Government Polytechnic, Angul (2016 – 2019) | Percentage: 65%
- Maa Mangala High School, Khalpal (2016) | Percentage: 70%
